E-mail: j.m.mol@vu.nl  
Date of birth: 17-08-1990

Jantsje Mol is a PhD candidate in the department of Environmental Economics of IVM Institute for Environmental Studies at the VU University Amsterdam. She has a research master in Neuroeconomics from Maastricht University, with a particular focus on experimental economics and behavioral economics. Her MSc thesis examined the possibilities of virtual reality (VR) as a new tool in experimental economics.

Currently, Jantsje is working on the PhD project concerning individual flood-preparedness for Low-Probability/High-Impact (LPHI) flood risk. This project aims at improving individual flood-preparedness by finding the determinants of individual decisions to invest in flood damage mitigation measures. She designs and conducts economic lab and field experiments to study how mitigation decisions are related to insurance incentives. Her main interests are behavioral economics and experimental economics.
